SUBJECT.

Sale of quinine by Shanbhogs & Patels

FILE No. 97 of 1904-05.

Sale of Quinine by Shanbhogs and Patels.

1 From the Senior Surgeon, No. G. 223, dated the 11th October 1904.
States that the sale of quinine through village shanbhogs and patels is not likely to prove a success, and recommends instead the supply of quinine in packets to such of the shanbhogs and patels as live in villages beyond three miles of any dispensary in the four districts of Kadur, Shimoga, Hassan and Mysore, for free distribution among the poor raiyats.

2 From the General and Revenue Secretary to Government, No. 5091, dated the 13th December 1904.
Requests the Senior Surgeon to try the experiment already sanctioned of selling quinine through the Village Officers and to provide in the next year's budget the amount required for trying the experiment now recommended by him.

Sir,

With reference to Government orders

Ag Z

No. 887 / Med 69-03 dated 3rd August 1904, I have the honor to say that on the manner in which the sale of Quinine is carried out, the good derivable therefrom entirely depends.

2. It may be well to summarise what has been done already in this direction.

2 The sale of Quinine powders was first introduced into Mysore about the beginning of the year 1897 by the Mysore Government and did not prove a success owing probably to the two following reasons, as pointed out by the Senior Surgeon in his letter No. 1791 dated 13th October 1900, viz, Log 101

"I am inclined to believe that this want of success is due to two main factors:.

1st The agency employed in the sale and distribution of powders is one that has quite enough work to do without having any more thrust upon it; Consequently little or no energy is displayed by it.

2nd That there are so many Local Fund Dispensaries throughout the Province, viz. one in every Taluk and often two where

Quinine is given gratis to all who ask, for it that there is no necessity for them to buy it."

Besides, Quinine is sold to the public through the agency of Post offices in the Mysore State.

Under these circumstances, it is not likely that the second experiment will prove a success.

Considering the number of lives that are annually lost by malarial fever and its complications, I recommend that Quinine in packets may be supplied to such of the Shanbogues and Patels who live in villages beyond three miles of any Dispensary in the four Districts of Kadur, Shemogah, Hassan and Mysore which are at present the most malari-ous, for free distribution among the poor ryots

If the Government approve of my recommendation, I request that they will be so good as to place tentatively a sum of Rs 3000/- to the credit of the Medical Stores for the purchase of Quinine and to sanction the employment of a Compounder on Rs 10/- per mensem for the making up of these packets.

I have the honor to be,

Sir,
